Swann-Morton®

ONE OF THE WORLD'S LEADING SURGICAL BLADE MANUFACTURERS

In addition to the more familiar traditional products Swann-Morton also provide a portfolio of blade and scalpel safety solutions available alongside their training programme on best practice when handling surgical blades which can also be accessed via their website in an online version for distance learning.

The single use blade remover, retractable safety scalpels, including a popular stitch cutter and the KLEEN blade management system are now joined by a Qlicksmart range featuring BladeFlask and BladeCassette offering simpler safer ways of removing and disposing of contaminated blades after use.

Swann-Morton in conjunction with Improve International will be introducing the new "BladeFlask EVO", a single handed blade removal

unit that can be conveniently located within each practice to safely remove and store up to 100 contaminated blades from all types of surgical handles whether standard, long, thick or rounded. In addition, there is "SnapIT" a multi-use ampoule opener helping in the reduction of unacceptable sharps injury rates associated with ampoules being opened by hand and the painful and dangerous sharps injuries inflicted.

When they rely on you - you can rely on us
